LIST OF FIGURES*

SECTION I

SECTION II
Figure 2.1: NFV Reference Architecture ................................................................. 8
Figure 2.2: NFV MANO Architecture Layers ............................................................. 13

SECTION III
Figure 3.1: Range of NFV-O Functions in Commercial Implementations .................. 15
Figure 3.2: Types of VM Workloads .......................................................................... 17
Figure 3.3: Open Source Foundations for OPNFV ...................................................... 19
Figure 3.4: Implementation Strategies for NFV MANO ............................................. 20

SECTION IV
Figure 4.1: OpenStack Releases .............................................................................. 22
Figure 4.2: OpenStack Capabilities .......................................................................... 23

SECTION V
Figure 5.1: NFV Virtualization/Virtualization Management Components by Vendor ...... 29
Figure 5.2: Vendor Strategies for VNFs & Adjacent Technologies .............................. 30
Figure 5.3: Extent of NFV MANO Vendors’ Portfolios ............................................. 32
Figure 5.4: Extent of CMS Vendor Portfolios .............................................................. 33

SECTION VI
Figure 6.1: Intel Contributions to OpenStack for SDN & NFV .................................. 47
Figure 6.2: BT Contribution to ETSI MANO Architecture Discussion ....................... 57
