# TABLE OF CONTENTS

1. **EXECUTIVE SUMMARY** .............................................................................................................. 3  
   1.1 Key Findings .......................................................................................................................... 4  
   1.2 Companies Covered .............................................................................................................. 5  

2. **DDOS ATTACKS: PROVEN IMPACTS ON THE CSP** ...................................................... 6  

3. **EMERGING TRENDS IN DDOS ATTACK THREATS** ............................................................. 9  
   3.1 Volumetric Attacks .............................................................................................................. 9  
   3.2 Application-Layer Attacks .................................................................................................. 9  
   3.3 Multi-Vector Attacks .......................................................................................................... 9  
   3.4 More Advanced Attack Techniques for Evading Detection .............................................. 9  
   3.5 The Rise of Smartphone Botnets ...................................................................................... 10  
   3.6 New DDoS Vulnerabilities Arising With SDN & NFV ......................................................... 10  

4. **DEFENDING THE CSP AGAINST DDOS ATTACKS** ............................................................ 12  
   4.1 Visibility & Detection Are the Starting Point ...................................................................... 12  
   4.2 Mitigation Techniques From "Blackholing" to In-Line Scrubbing ..................................... 12  
   4.3 Highly Reliable Automation Is the Holy Grail ................................................................... 14  
   4.4 Leveraging NFV & SDN for DDoS Defense ...................................................................... 14  
   4.5 Leveraging Defensive Assets Throughout the Network ................................................... 16  
   4.6 IETF & ATIS Standardization Efforts ............................................................................. 17  

5. **THE VENDOR ECOSYSTEM IN DDOS PROTECTION** .......................................................... 18  

6. **PROTECTION AS A SERVICE: OPPORTUNITY & RISK** .................................................. 20  
   6.1 Competition From Internet Giants .................................................................................... 21  
   6.2 The CSPs’ Key Differentiator – Really? .......................................................................... 21  

**TERMS OF USE** ........................................................................................................................... 22
