LIST OF FIGURES

SECTION I
Figure 1 Public and Private Companies in the Survey

SECTION II
Figure 2 MSPP Nodes Already Deployed
Figure 3 Metro Intelligent Sonet/SDH Switch Market Size

SECTION III
Figure 4 Where Do MSPPs Fit?
Figure 5 Simple Functional Model of Metro Multiservice Provisioning Platform
Figure 6 Two Basic MSPP Categories
Figure 7 How the Products Are Divided
Figure 8 When is the Ethernet Tipping Point?
Figure 9 Network Migration: Transport Network Today
Figure 10 Network Migration: Multiservice Evolution
Figure 11 Current MSPP Network Architecture
Figure 12 MSPP Core Aggregation System

SECTION IV
Figure 13 Software and Hardware Engineers as Percentage of Staff
Figure 14 Major Technologies Used
Figure 15 Comparison of Technologies Used
Figure 16 Client-service and Network Interfaces Supported
Figure 17 Comparison of Client-Service and Network Interfaces
Figure 18 Network Topologies Supported
Figure 19 Comparison of Network Topologies
Figure 20 Network Traffic Capabilities
Figure 21 Comparison of Network Traffic Capabilities
Figure 22 MSPPs and Integrated Management Systems
Figure 23 Comparison of Integrated Management Systems
Figure 24 Indications of Installed Port Densities and Size Ranges
Figure 25 Management Capabilities
Figure 26 Comparison of Management Capabilities
Figure 27 Testing Capabilities Supported
Figure 28 Comparison of Testing Capabilities
Figure 29 Applications of Interest for Platform Design

SECTION V
Figure 30 MSPP Pricing Examples

SECTION VII
Figure 31 Survey Findings at a Glance
Figure 32 Products to Support Carrier Goals

APPENDICES
Figure 33 Basic Transport Products Not Included in Table
Figure 34 Access Products Not Included in Table – Especially DSLAM / B-RAS Systems
