LIST OF FIGURES

SECTION I

Figure 2.1 Campus Backbone
Figure 2.2 IEEE 802.3ae PHY Implementations
Figure 2.3 Fiber and Distances for Standard IEEE Ports
Figure 2.4 Source of Optical Technology Used by Transponder Vendors

SECTION II

Figure 3.1 Typical 10GE Line Card
Figure 3.2 Companies With Three or More 10GE LAN Functions

SECTION IV

Figure 4.1 Announced Transponders
Figure 4.2 300-Pin Transponder
Figure 4.3 Low-Power 300-Pin Transponder Modules
Figure 4.4 Xenpak Transponder
Figure 4.5 Xenpak Modules With Parallel Interfaces (LX4, CX4)
Figure 4.6 XPAK Transponder
Figure 4.7 XPAK Transponder Summary
Figure 4.8 X2 Transponder
Figure 4.9 X2 Transponder Heights
Figure 4.10 Summary of X2 10GBase-LR Modules
Figure 4.11 XFP Transceiver Module
Figure 4.12 Lower-Power 10km XFP Transceiver Modules

SECTION V

Figure 5.1 Transponder Vendors by Form Factor
Figure 5.2 Transponder Vendors by Wavelength and IEEE Port

SECTION VI

Figure 6.1 300-Pin Transponder Application
Figure 6.2 XSBI PHY Summary
Figure 6.3 XSBI Transceiver Suppliers Used by 300-Pin Transponder Manufacturers
Figure 6.4 XSBI Transceiver Summary
Figure 6.5 Xenpak, X2, and XPAK Transponder Application
Figure 6.6 Latest XGMII-XAUI Transceivers
Figure 6.7 XAUI-10G PHY Suppliers Used by Xenpak Transponder Vendors
Figure 6.8 Latest XAUI-10G Serial PHYs for 10GBase-LR Modules
Figure 6.9 XAUI Retimer Devices for 10GBase-CX4
Figure 6.10 XGMII-XFI PHY Summary
Figure 6.11 CDR Suppliers Used by XFP Transceiver Module Manufacturers
Figure 6.12 XFP Transceiver Application
Figure 6.13 10-Gbit/s Serial Retimer Summary
SECTION VII

Figure 7.1 PHY Vendor Summary

APPENDIX A

Figure A.1 300-Pin Transponders
Figure A.2 Xenpak Transponders
Figure A.3 XPAK Transponders
Figure A.4 X2 Transponders
Figure A.5 XFP Transponders

APPENDIX B

Figure B.1 XSBI PHYs
Figure B.2 XSBI Transceivers
Figure B.3 XAUI Transceivers
Figure B.4 XAUI-10G Serial PHYs
Figure B.5 XAUI Retimer & Backplane Muxes
Figure B.6 XGMII-XFI PHYs
Figure B.7 10-Gbit/s Serial Retimers
