TABLE OF CONTENTS

LIST OF FIGURES

I. INTRODUCTION AND KEY FINDINGS
   1.1 Key Findings
   1.2 Report Structure

II. A SOFTSWITCH TAXONOMY
   2.1 What Is a Softswitch?
   2.2 Why Are Softswitches Important?
   2.3 What Is a Distributed Softswitch?
   2.4 What Is an Integrated Softswitch?
   2.5 Why Are Integrated Softswitches Important?
   2.6 What Is Class 5 Migration?

III. VOIP NETWORK ARCHITECTURES
   3.1 IPCC vs. MSF Architectures

IV. VOIP NETWORK APPLICATIONS AND MARKET DRIVERS
   4.1 Applications for Distributed Softswitches
   4.2 Applications for Integrated Softswitches
   4.3 VOIP Market Drivers
      – New Service Deployment
      – Obsolescent Equipment Replacement
      – Capex and Opex Saving
      – Increased Customer Base
      – Regulatory Drivers

V. DISTRIBUTED CLASS 5 SOFTSWITCHES
   5.1 Vendor and Product Overview
      – Alcatel 1000 Softswitch and 5020 Softswitch
      – Cirpack HVS and SuperNode-B
      – Cisco Systems BTS 10200
      – Ericsson Engine Integral TeS
      – Huawei SoftX 3000
      – Italtel iMSS
      – Lucent Technologies Softswitch
      – Marconi XCD 5000 Call Agent
      – NetCentrex CCS
      – Nortel Networks Succession Communication Server 2000
      – Nueva ORCA SSC
      – Open Telecommunications openCall Agent
      – Samsung Electronics SSX 5000
      – Siemens Surpass hiE 9200 and hiQ 8000
      – Sonus Networks Insignus
5.2 Product Analysis
5.3 Comparing Equipment Features for 100,000 Subscribers
5.4 Comparing Equipment Features for 1 Million Subscribers
5.5 Scaleability
5.6 Architecture Support
5.7 Protocol Features
5.8 Interoperability
5.9 Distributed Softswitch Summary

VI. INTEGRATED CLASS 5 SOFTSWITCHES

6.1 Vendor and Product Overview
   – Cedar Point Safari C3
   – Cirpack LEN and SuperNode-B
   – Lucent iGEN Compact Switch
   – MetaSwitch VP 3500
   – Sentito NEO Services Switch
   – Tekelec SanteraOne and Taqua i7000
   – Telica Compact Softswitch
6.2 Product Analysis
6.3 Comparing Equipment Features
6.4 Interface Features
6.5 Switching and Broadband QOS Features
6.6 Scaleability
6.7 Protocol Features
6.8 Codecs and Signal Processing Features
6.9 Architecture Support
6.10 Interoperability
6.11 Integrated Softswitch Summary

VII. CLASS 5 MIGRATION TO VOIP PRODUCT APPLICATIONS

7.1 Application 1: Phone to Phone Over a Migrated Class Infrastructure
7.2 Application 2: Phone to Phone Over Derived Lines From DSL IADs
7.3 Application 3: Business Services to IP Phones
7.4 Application 4: VOIP Call Handoff to the TDM PSTN
7.5 Application 5: Signaling SIP Calls to the PSTN – "U.S. Model"
7.6 Application 6: Signaling SIP Calls to the PSTN – Alternative "Euro-model"
7.7 Application 7: VOIP to VOIP Network Operator Handoff
