LIST OF FIGURES*

SECTION I

SECTION II
Figure 2.1 Elements of Fixed-Mobile Convergence .......................................................... 7
Figure 2.2 Proposed Converged Services ....................................................................... 8
Figure 2.3 Conceptualized Image of a Converged Service Screen .................................. 10
Figure 2.4 Timeline for Near-Term Converged Service Rollout .................................... 10
Figure 2.5 Converged End-User Devices ..................................................................... 12

SECTION III
Figure 3.1 Mobile and Fixed Service Subscribers in the World’s Top 12 Markets ......... 13
Figure 3.2 Mobile Line Substitution in Sweden ............................................................ 14
Figure 3.3 Advantage Mobile? The Global Metrics ....................................................... 15
Figure 3.4 How Substitution Reduces Margins ............................................................. 16
Figure 3.5 Different Approaches to Wireless Data Service Pricing ............................... 19
Figure 3.6 Substitution and Convergence in Different Market Segments .................. 20
Figure 3.7 Marketing Convergent Services .................................................................. 20

SECTION IV
Figure 4.1 Current and Near-Term Convergent Services, Selected Examples .......... 21
Figure 4.2 Current and Near-Term Implementations by Type and Target .................. 23
Figure 4.3 Current and Near-Term Services by Main Attributes ................................ 24
Figure 4.4 WiFi Cities ................................................................................................. 25
Figure 4.5 BT’s Share of Voice Minutes ...................................................................... 26
Figure 4.6 Differences Between BT Bluephone and iPass .......................................... 28

SECTION V
Figure 5.1 Survey Respondents by Region .................................................................. 31
Figure 5.2 Survey Respondents by Service Provider Type ........................................ 31
Figure 5.3 Respondent Job Functions ......................................................................... 32

SECTION VI
Figure 6.1 Key Standards Bodies and Their Role in FMC ......................................... 40
Figure 6.2 Key Standards for FMC Development ....................................................... 41
Figure 6.3 Major Wireless Access Technologies by Mobility and Bandwidth ........... 45
Figure 6.4 WiFi/Cellular Terminals and Services: Major Challenges ......................... 47

SECTION VII
Figure 7.1 Incumbent Earnings From Mobile Services ............................................... 54
Figure 7.2 SWOT Analysis: Incumbent Wireline Telcos .............................................. 55
Figure 7.3 SWOT Analysis: Competitive Wireline Telcos .......................................... 56
Figure 7.4 SWOT Analysis: MSOs ............................................................................ 56
Figure 7.5 SWOT Analysis: ISPs and BSPs ................................................................. 56
Figure 7.6 SWOT Analysis: Cellular Mobile ............................................................... 57
Figure 7.7 SWOT Analysis: MVNOs ......................................................................... 57
Figure 7.8 SWOT Analysis: Alternative Wireless (e.g. WISPs, Fixed Broadband)... 57
