LIST OF FIGURES*

SECTION I

SECTION II

Figure 2.1 FastWeb ARPU Details for IPTV ............................................................. 11
Figure 2.2 Telecom IP Video Service Definitions ..................................................... 12
Figure 2.3 Limitations of Today's Broadband Edge Network Architecture.............. 13
Figure 2.4 Planning for Future VOD Title and Stream Counts ............................... 15
Figure 2.5 The Centralized Single-Edge Architecture ............................................ 17
Figure 2.6 Pros and Cons of the Centralized Single-Edge Architecture................ 18
Figure 2.7 The Distributed Single-Edge Architecture ............................................. 19
Figure 2.8 Pros and Cons of the Distributed Single-Edge Architecture ................. 20
Figure 2.9 The Centralized Multi-Edge Architecture ............................................ 21
Figure 2.10 The Distributed Multi-Edge Architecture ........................................... 22
Figure 2.11 SBC's Distributed IPTV Reference Architecture .................................. 24
Figure 2.12 SBC's "All Ethernet" Approach .......................................................... 24
Figure 2.13 SBC's FTTN Access Node to Aggregation Node Connection ............... 25
Figure 2.14 Telenor's All IP Network Architecture .............................................. 26
Figure 2.15 FastWeb's Service Mix ....................................................................... 27
Figure 2.16 FastWeb's Broadband Edge Network Architecture for VOD ............... 28
Figure 2.17 Mapping Equipment Vendors to Network Architectures Supported ...... 28
Figure 2.18 The New Broadband Edge Taxonomy ................................................ 29

SECTION III

Figure 3.1 Juniper's E-Series Subscriber Density Evolution............................... 31
Figure 3.2 Optimizing QOS Management in Distributed Architectures............... 34
Figure 3.3 Centralized QOS Architectural Model .................................................. 34
Figure 3.4 IP Multicast in Next-Gen Broadband Edge Networks ......................... 35

SECTION IV

Figure 4.1 Alcatel's End-to-End Solution for TPSDA .......................................... 40
Figure 4.2 Cisco's 7600 in the Context of an End-to-End IP Video Solution .......... 42
Figure 4.3 Cisco's Analysis of Multi-Edge Architecture Considerations ............... 43
Figure 4.4 ECI's View of the New Edge Network .................................................. 45
Figure 4.5 Juniper's E-Series Product Line ......................................................... 47
Figure 4.6 Juniper's E320 in a Centralized Broadband Edge Architecture .......... 48
Figure 4.7 Redback's SmartEdge 800 in a Centralized Single-Edge Architecture ... 50
Figure 4.8 Siemens' Broadband Edge Solution ...................................................... 53
Figure 4.9 Vendor Rank and Score Table .............................................................. 55

SECTION V

APPENDIX A

Figure A.1 Vendor Ratings by Evaluation Metrics ............................................... 60
