LIST OF FIGURES*

SECTION I
Figure 1.1 Light Reading Carrier Ethernet Live Event Attendees ........................................ 4

SECTION II
Figure 2.1 Legacy Revenue Performance of Incumbents .................................................. 9

SECTION III
Figure 3.1 Ethernet Services Framework ........................................................................ 11
Figure 3.2 Ethernet Connectivity Services Definition Highlights ..................................... 12
Figure 3.3 E-Line Services ............................................................................................ 12
Figure 3.4 E-LAN Services ........................................................................................... 12
Figure 3.5 InterCity EVPLAN Service .......................................................................... 13

SECTION IV
Figure 4.1 Carrier Ethernet Service Offerings in Europe ................................................ 15
Figure 4.2 Completel Network Expansion Details .......................................................... 16
Figure 4.3 Complete Network Expansion With DSL ....................................................... 16
Figure 4.4 Fibernet TANet Ethersphere and Etherline Services ......................................... 17
Figure 4.5 Role of Ethernet in France Telecom’s One Network Vision ............................... 18
Figure 4.6 Swisscom Ethernet Network Overview .......................................................... 19
Figure 4.7 Telefónica Ethernet Network Evolution ........................................................ 20

SECTION V
Figure 5.1 Ethernet Service Offerings of Profiled Carriers in Europe .............................. 22
Figure 5.2 Belgacom BiLAN VPN Options ..................................................................... 24
Figure 5.3 Belgacom Ethernet Service Portfolio ............................................................. 25
Figure 5.4 Belgacom Ethernet Connectivity Services at a Glance ................................... 26
Figure 5.6 BT Ethernet Service Portfolio ....................................................................... 29
Figure 5.7 BT Ethernet Connectivity Services at a Glance ............................................. 29
Figure 5.8 COLT Ethernet Service Portfolio .................................................................. 32
Figure 5.9 COLT Ethernet Connectivity Services at a Glance ......................................... 32
Figure 5.10 Exponential-e MPLS VPN Service Comparison .......................................... 34
Figure 5.11 Exponential-e Service Model ....................................................................... 34
Figure 5.12 Exponential-e Ethernet Service Portfolio ...................................................... 36
Figure 5.13 Exponential-e Ethernet Connectivity Services at a Glance ............................... 36
Figure 5.14 Interoute’s View on Ethernet Connectivity Solutions .................................... 38
Figure 5.16 Interoute Ethernet Service Portfolio ............................................................. 39
Figure 5.17 Interoute Ethernet Connectivity Services at a Glance ................................... 39
Figure 5.18 ntl:Telewest Business Ethernet Service Portfolio ......................................... 42
Figure 5.19 ntl:Telewest Business Ethernet Connectivity Services at a Glance .................. 42
Figure 5.20 T-Systems Services Value Chain ................................................................. 45
Figure 5.21 T-Systems Metro Network – Migrating From Circuit to Packet ..................... 46
Figure 5.22 T-Systems Ethernet Service Portfolio .......................................................... 47
Figure 5.23 T-Systems Ethernet Connectivity Services at a Glance ................................. 47
Figure 5.24 Ethernet as a Converged Access Platform .................................................... 48
Figure 5.25 Verizon Europe Ethernet Service Portfolio ................................................... 50
Figure 5.26 Verizon Europe Ethernet Connectivity Services at a Glance ........................... 50
