**LIST OF FIGURES**

**SECTION I**

Figure 2.1  The Coupling of Traffic & Revenue ........................................................... 9

**SECTION II**

**SECTION III**

Figure 3.1  The Business Case for T1 Replacement With Ethernet ......................... 12
Figure 3.2  FTTH Households & Penetration by Top Ten Countries (2011)............... 13
Figure 3.3  Performance Challenges for Mobile Backhaul Over Ethernet ................. 14
Figure 3.4  1588 & Synchronous Ethernet (G.8621) .................................................... 17
Figure 3.5  Five Solutions to the Synchronization Problem in GSM/W-CDMA ......... 18

**SECTION IV**

Figure 4.1  Time Warner’s Ethernet Backhaul Deployment...................................... 20
Figure 4.2  Telecom Italia’s Live Ethernet Backhaul Deployment............................ 21
Figure 4.3  The Data Offload/Hybrid Approach to Ethernet Backhaul ...................... 22

**SECTION V**

Figure 5.1  Mobile Backhaul via Ethernet in the Verizon ETAG Service Model ...... 26

**SECTION VI**

Figure 6.1  Heavy Reading’s Ethernet Backhaul Equipment Taxonomy ................. 28
Figure 6.2  The Alcatel-Lucent 1850 Transport System ............................................ 31
Figure 6.3  Forecast for Global CESR Market Applications ...................................... 33

**SECTION VII**

Figure 7.1  Ethernet/MPLS Business Case – ATM MSS vs. MSR vs. MSPP .......... 34

**SECTION VIII**

Figure 8.1  Adtran’s MX3112 ..................................................................................... 36
Figure 8.2  Atrica CESR Positioning for Ethernet Backhaul ...................................... 41
Figure 8.3  Ceterus Circuit-Bonding Products in a Mobile Backhaul Network ........ 46
Figure 8.4  The CN 3000 in Ciena’s Ethernet Backhaul Proposition ....................... 47
Figure 8.5  The XDM in the ECI Telecom Portfolio .................................................. 49
Figure 8.6  Fujitsu’s Flashwave Series ...................................................................... 52
Figure 8.7  The Hatteras Networks Approach to Copper Bonding ....................... 53
Figure 8.8  The Surpass hiD in Ethernet Backhaul Configurations ......................... 56
Figure 8.9  Nortel Networks’ Ethernet Backhaul Portfolio ........................................ 58

* All charts and figures in this report are original to Heavy Reading, unless otherwise noted.
