LIST OF FIGURES*

SECTION I

SECTION II

Figure 2.1: The Decoupling of Traffic & Revenue ................................................................. 9
Figure 2.2: Synergies Between SDN & NFV ..................................................................... 11
Figure 2.3: Characteristics of Three New Approaches to Network Management .......... 13
Figure 2.4: Network Abstraction & Automation Layer Vendor Positioning ............... 15
Figure 2.5: Management Applications Sit on Top of SDN Controller ......................... 16
Figure 2.6: High-Level NFV Framework ............................................................................. 17
Figure 2.7: The ETSI NFV Reference Architecture in Detail ........................................ 18
Figure 2.8: Applying Application Lifecycle Management Concerns to NFV MANO ...... 21

SECTION III

Figure 3.1: Profiled Vendors by Category .......................................................................... 27
Figure 3.2: Network Abstraction & Automation Vendor Market Positioning ............. 29
Figure 3.3: SDN Controller Vendor Market Positioning ................................................. 30
Figure 3.4: Big Picture Vendor Market Positioning ........................................................... 31
Figure 3.5: NFV MANO Component Vendor Market Positioning .................................. 32

SECTION IV

SECTION V

SECTION VI

Figure 6.1: Alcatel-Lucent's Next-Generation OSS Architecture for SDN & NFV ...... 45
Figure 6.2: Cisco ONE Architecture .................................................................................. 46
