LIST OF FIGURES*

SECTION I

SECTION II

Figure 2.1: SS7 vs. IP-Based Control Plane ................................................................. 7
Figure 2.2: Diameter Routing Options: Peer vs. Centralized ........................................ 8
Figure 2.3: DSC Deployment Drivers ............................................................................. 8
Figure 2.4: Diameter DSC Architecture: Hardware vs. Virtualized ............................. 9
Figure 2.5: Diameter Signaling as Service Enabler ....................................................... 10

SECTION III

Figure 3.1: Vendor Product Strategy & Market Focus Summary ................................. 11
Figure 3.2: BFX IWF Logic Flow ................................................................................ 14
Figure 3.3: Diametrix's IOT Portfolio ........................................................................... 18
Figure 3.4: Elitecore's IOT Portfolio ............................................................................. 20
Figure 3.5: Huawei's IOT Portfolio ............................................................................. 26
Figure 3.6: DSR Integration Into ThinkingNetworks ..................................................... 29
Figure 3.7: Tango Telecom's IOT Portfolio ................................................................. 30
Figure 3.8: Ulticom's IOT Portfolio ............................................................................. 33
Figure 3.9: Transforming the Competitive Landscape ................................................... 35

SECTION IV
