LIST OF FIGURES*

SECTION I

SECTION II
Figure 2.1: Global Rate of Adoption of Ethernet Backhaul .........................................................7
Figure 2.2: The Penetration of L3 in the Core, Aggregation & Access Layers ................................8
Figure 2.3: The Need for L3 in the Access Layer of the Backhaul .............................................9
Figure 2.4: The Global Equipment Market in Mobile Backhaul Routers, 2008-2013 ...................10

SECTION III
Figure 3.1: Global Mobile Data Traffic Growth ...........................................................................11
Figure 3.2: Toward 3GPP R10 & Theoretical LTE Peak Rates of 1 Gbit/s .....................................12
Figure 3.3: Rerouting in the Backhaul With SDN ......................................................................14
Figure 3.4: Virtualized Routing Instances for Mobile Backhaul Networks .................................16

SECTION IV
Figure 4.1: Cell Site Routers in a C-RAN Fronthaul Architecture .............................................22

SECTION V
Figure 5.1: Global Router Shipments Into Mobile Backhaul Networks .................................24

SECTION VI

* All charts and figures in this report are original to Heavy Reading, unless otherwise noted.
